Technical Data and Parameter
Technische Daten und Parameter

The product fulfils the requirements acc. to IEC 61511:2003 and IEC 61508 Ed.2 in accordance with SIL2 and SC2. It is designed with a hardware fault tolerance HFT = 0 (1oo1- architecture).

Specific Requirements
Spezifische Anforderungen

This certificate confirms the achievement of the requirements of functional safety based on the following proofs:

- Proof of systematic safety integrity for defined phases of the life cycle
- Proof of the required safety-related hardware parameters (SIL 2 failure rate, PFD, SFF by means of FMEDA)
- Proof of the safety-related techniques and measures according to SIL 2
- Proofs that processes and methods are established at the manufacturer guaranteeing that unexceptionable processes in terms of risk analysis, design, production, validation, change management and quality management comply with the safety-related standard (see G04R0009)
